

Protective Industrial Products prides itself on providing value added services with a personal touch to the industrial, manufacturing and construction work environments.

Promoting employee safety first, along with cost saving solutions using innovative products that are built for many applications is the corner stone of Protective Industrial Products PPE program. The PIP<sup>®</sup> On-Site PPE Assessment is a comprehensive process that can be applied on a global basis or to one location.

PIP<sup>®</sup> has over 150 trained Safety professionals that have a collective knowledge base and experience in excess of 1000 years. This knowledge base will provide your organization with the correct product in any application. Through this program PIP<sup>®</sup> will help you maximize your safety solutions while minimizing safety costs.

## ASSESS & DOCUMENT

A team comprised of customer, distributor and PIP<sup>®</sup> associates assess problem areas to identify existing products and practices by department and application.

## ANALYSIS

PIP<sup>®</sup> conducts a thorough analysis of site observations and collected data to determine the right products and develop a proposed set of solutions.

## PRESENT & TEST

Review a concise, comprehensive analysis of site findings and proposed solutions to develop and implement a product trial program.

## MEASURE

PIP<sup>®</sup> documents user feedback on product performance and actual cost improvement benchmarks to determine trial program effectivity.

## PPE CATEGORIES ABLE TO BE ASSESSED:
